

MICHELLE CHUNG

Product Engineer | React Native | FastAPI | AI Applications

San Francisco, CA | mchung099@gmail.com | 415-861-9342 | [LinkedIn](#) [Github](#) [Portfolio](#)

SKILLS

Python, TypeScript, JavaScript, SQL | React, React Native, Next.js, Expo, Tailwind
FastAPI, PostgreSQL, Supabase, SQLAlchemy, Alembic | Playwright, Pytest, Selenium, Jest, Redis, Docker, AWS S3

EXPERIENCE

AI Model Quality Analyst (Software Engineering domain) - Handshake

June 2026 - Present

- Evaluate AI-generated responses to software engineering and coding tasks for accuracy, clarity, and usefulness.
- Apply quality rubrics to identify issues in technical reasoning, communication, and alignment with user requests.

Full Stack Product Engineer - Skin Story

React Native app with FastAPI backend that uses AI and scraped ingredient data to analyze skincare routines and triggers

Apr 2025 - Present • [live](#) | [case study](#)

- Built core product flows for logging skincare routines, symptoms, and product use over time.
- Developed an AI journaling feature that turns conversational journal entries into structured skincare insights and suggested next steps.
- Designed backend logic to identify possible 7-day trigger patterns across product, ingredient, and symptom history.
- Migrated scraping from Selenium to Playwright, reducing scrape time by 24% and improving product coverage.
- Improved database performance and reliability by batching writes and reducing duplicate records to prevent inconsistent app states.

Frontend Engineer - Freelance (Charisse Yeh)

Jul 2024 - Oct 2024 • [github](#)

- Enhanced user onboarding in a **React Native** app by collaborating with a UX/UI designer to implement **Figma** designs, integrating **Firebase** for secure user creation and photo uploads.
- Built a polished onboarding flow using React Navigation and custom components, making sign-up easier for users.

Software Engineering Intern - Dorsal AI

Sept 2023 - Dec 2023

- Developed a **REST API** to retrieve 10-K/10-Q reports from Sec.gov and transcripts, reducing latency in loading performance by 20%.
- Designed an interactive dashboard in **Next.js** with infinite pagination, increasing rendering performance by 35%.
- Created utility functions for financial data processing and display, enhancing code modularity and maintainability.
- Leveraged **Supabase** to store static assets in CDN to reduce server load and improve load times.
- Evaluated RAG pipelines (RetrievalQA, Map-Reduce, Stuff) for earnings call analysis, identifying tradeoffs in summarization and guidance extraction quality.

Relationship Banker - Bank of America

Jul 2022 - Nov 2022

- Fostered strategic partnerships by connecting clients with specialized bankers and provided personalized advice based on clients' financial needs, achieving a 20% improvement in client retention rates.

PROJECTS

SEC 10K/10Q Dashboard Refactor | ([Next.js](#), [TanStack Query](#), [TypeScript](#))

[github](#)

- Refactored data fetching with **TanStack Query** and added a service layer for separation of concerns.
- Replaced offset pagination with cursor-based pagination to prevent duplicate records and improve reliability.

EDUCATION

University of Illinois Urbana-Champaign - B.A. Consumer Economics and Finance, 2021

App Academy - Web Development Bootcamp, Jan 2023 - May 2023
